

# Public Comments and Responses on the Administrative Record

---

The NPS released the Administrative Record for the Newhalem Penstock Time Critical Removal Action in March, 2017 for a 30-day formal comment period. During this time, the public was welcome to submit comments via the Site website or by mail. Only one comment was received – via the Site website, and it appeared to relate to another planning effort at the park, namely the Grizzly Bear Restoration Plan and Environmental Impact Statement.
