Memorandum

To: Brian Martin

From: Superintendent, Yosemite National Park

Subject: NEPA and NHPA Clearance: 2011-008 Yosemite Valley Residences 79, 81, & 82
Propane Tank Installation (34888)

The Executive Leadership Team has reviewed the proposed project/action and completed its environmental assessment documentation, and we have determined that there:

- Will not be any effect on threatened, endangered, or rare species and/or their critical habitat.
- Will not be any effect on historical, cultural, or archeological resources.
- Will not be serious or long-term undesirable environmental or visual effects.

The subject proposed project, therefore, is now cleared for all NEPA and NHPA compliance requirements as presented above. Project plans and specifications are approved and construction can commence.

For the proposed project actions to be within compliance requirements during construction and/or project implementation, the following mitigations must be adhered to:

- Informal consultation for this project was initiated through an update of all park projects. This update was sent to all seven culturally associated tribes and groups on June 9, 2011. Furthermore, an existing task agreement is in place to work with a cultural monitor on this project.
- Archeological monitoring required during ground disturbance.

For complete compliance information see PEPC Project 34888.

Categorical Exclusion Form

Project: 2011-008 Yosemite Valley Residences 79, 81, & 82 Propane Tank Installation

PEPC Project Number: 34888

Project Description:

Install one 500 gallon propane tank between Residences 79 & 81 and one 300 gallon propane tank at Residence 82. Install underground propane piping from the tanks to the residences in trenches 18" deep by approximately 6" wide and 50' feet long. Tank and trench locations are to be determined by joint effort involving Facilities Management and Resources Management and Sciences staff. Tank color will be chosen to blend into the surrounding environment.

Project Locations:

- Mariposa County, CA

Mitigation:

- Informal consultation for this project was initiated through an update of all park projects. This update was sent to all seven culturally associated tribes and groups on June 9, 2011. Furthermore, an existing task agreement is in place to work with a cultural monitor on this project.
- Archeological monitoring required during ground disturbance.

Describe the category used to exclude action from further NEPA analysis and indicate the number of the category (see Section 3-4 of DO-12):

C.15 Installation of underground utilities in previously disturbed areas having stable soils, or in an existing utility right-of-way.

On the basis of the environmental impact information in the statutory compliance file, with which I am familiar, I am categorically excluding the described project from further NEPA analysis. No exceptional circumstances (e.g. all boxes in the ESF are marked "no") or conditions in Section 3-6 apply, and the action is fully described in Section 3-4 of DO-12.
