### Memorandum

**To:** Ron Gaunt, Project Manager, Yosemite National Park

**From:** Superintendent, Yosemite National Park

**Subject:** NEPA and NHPA Clearance: 2013-007 Ahwahnee Correct Balcony Deficiencies (47575)

The Executive Leadership Team has reviewed the proposed project/action and completed its environmental assessment documentation, and we have determined the following:

- There will not be any effect on threatened, endangered, or rare species and/or their critical habitat.
- There will be no adverse effect to historical properties.
- There will not be serious or long-term undesirable environmental or visual effects.

The subject proposed project, therefore, is now cleared for all NEPA and NHPA compliance requirements as presented above. Project plans and specifications are approved and construction and/or project implementation can commence.

For the proposed project actions to be within compliance requirements during construction and/or project implementation, the following mitigations must be adhered to:

- To minimize the visual intrusion impacts of the safety guardrail from the ground, the new handrail shall be designed to be of the minimal profile possible, in terms of both its vertical supports and horizontal rail. The horizontal support must consist of a single steel cable. The final design of the handrail shall be with input from Historic, Architect, and Landscape staff and with final approval by the Park Historical Architect.

For complete compliance information see PEPC Project 47575.

## Categorical Exclusion Form

**Project:** 2013-007 Ahwahnee Correct Balcony Deficiencies

**PEPC Project Number:** 47575

**Project Description:**

This project will provide a permanent rehabilitation of the solarium ceiling and correct deck surface design deficiencies on four balconies at The Ahwahnee Hotel. The solarium ceiling was damaged in several locations during heavy rain events as a result of cracks in the lead deck surface on the second floor balcony deck. The solarium ceiling plaster is part of the historic fabric of the hotel. The 2nd floor balcony deck was replaced in 2005 with waterproofing and finish, therefore it does not have historic integrity. The remaining three decks were also inspected and included in the work scope to prevent future water infiltration and damage to fabric.

The construction scope of work for decks includes:

1. Remove the walking surfaces from each balcony and salvage for re-installation.
2. Remove lead sheet waterproofing on all decks and store on The Ahwahnee property (in back employee parking area east of cottages). Delaware North Companies (DNC) to sell lead and offset project costs with proceeds. All decks will be stripped of lead in its entirety with the exception of the lead located under the existing two sets of stairs on the 2nd floor balcony, which will remain as it will be too costly to remove and this area is a low risk for lead sheeting failure.
3. Install 3-ply modified bitumen plaza grade waterproofing directly over existing concrete deck substrate of the 2nd, 4th and 5th floor decks. For the 7th floor deck, a wood deck will be built up over the existing two tiered deck to provide a uniform slope. The 3-ply bitumen will then be installed on the wood substrate. Color of exposed bitumen shall be approved by NPS/DNC prior to purchasing material. The bitumen waterproofing shall have a manufacturer's warranty of 30 years.
4. Remove, salvage and re-install copper cap flashing pans and bronze cap plates at all locations. Install new copper where required.
5. On 2nd floor balcony, install two additional outlet scuppers to allow better drainage from deck.
6. At all decks, provide heat trace systems in new and existing downspouts to prevent freezing.
7. On 7th floor balcony, provide new safety guardrail. Design of handrail shall be with input from the NPS Historical Architect.
8. Following waterproofing installation, re-install walking surfaces in same pattern as existing.

Solarium work includes rehabilitating the lath and plaster finish on the solarium ceiling where damage has occurred. This will also include pull testing of the support wire and inspection of the structural bar supports to confirm structural integrity.

**Project Locations:**

Mariposa County, CA

**Mitigations:**

- To minimize the visual intrusion impacts of the safety guardrail from the ground, the new handrail shall be designed to be of the minimal profile possible, in terms of both its vertical supports and horizontal rail. The horizontal support must consist of a single steel cable. The final design of the handrail shall be with input from park History, Architecture, and Landscape staff and with final approval by the Park Historical Architect.

**Describe the category used to exclude action from further NEPA analysis and indicate the number of the category (see Section 3-4 of DO-12):**

C.4 Routine maintenance and repairs to cultural resource sites, structures, utilities and grounds under an approved Historic Structures Preservation Guide or Cyclic Maintenance Guide; or if the action would not adversely affect the cultural resource.

**On the basis of the environmental impact information in the statutory compliance file, with which I am familiar, I am categorically excluding the described project from further NEPA analysis. No exceptional circumstances (e.g. all boxes in the ESF are marked "no") or conditions in Section 3-6 apply, and the action is fully described in Section 3-4 of DO-12.**

Assessment of Effect:  No Potential to Cause Effect  No Historic Properties Affected  No Adverse Effect  Adverse Effect  Streamlined Review

Recommendations for conditions or stipulations: It is our understanding that the new safety guardrail on the 7th floor balcony is necessary due to modern code requirements. However, it also represents the addition of a new element to the National Historic Landmark. Therefore, to minimize the impact of this visual intrusion from the ground, the new handrail shall be designed to be of the minimal profile possible, in terms of both its vertical supports and horizontal rail. We understand that the horizontal is currently proposed to consist of a single steel cable. The final design of the handrail shall be with input from HAL and with final approval by the Park Historical Architect.
