Memorandum

To: Kevin M. Keheley

From: Superintendent, Yosemite National Park

Subject: NEPA and NHPA Clearance: 2014-037 Valley Fort Unsafe Door Replacement (55426)

The Executive Leadership Team has reviewed the proposed project and completed its environmental assessment documentation, and we have determined the following:

- There will not be any effect on threatened, endangered, or rare species and/or their critical habitat.
- There will be no adverse effect on historical, cultural, or archeological resources.
- There will not be serious or long-term undesirable environmental or visual effects.

The subject proposed project, therefore, is now cleared for all NEPA and NHPA compliance requirements as presented above. Project plans and specifications are approved and construction and/or project implementation can commence.

Recommendations for Conditions or Stipulations:

For the proposed project actions to be within compliance requirements during construction and/or project implementation, the following mitigations must be adhered to:

- Ensure park historical architect is consulted on final door design.
- Coordinate with park historical architect to correctly remove and retain the original doors on site.

For complete compliance information see PEPC Project 55426.

Project: 2014-037 Valley Fort Unsafe Door Replacement

PEPC Project Number: 55426

Project Description:

This project proposes to replace five original doors in the Yosemite Valley Group Utility Building (Fort Yosemite #527), built in 1935, which is a contributing structure to the Yosemite Village developed area listed in the Yosemite Valley District (placed on the National Register of Historic Places in 2006). The doors are character defining elements to the building. Currently, seven of the personnel doors do not comply with 29 CFR 1910.36(b) Headroom; 29 CFR Sec. 5 (1) Fundamental Requirements; UBC 1003.3.1.3 width and height. In 2008, the buildings and Grounds Branch replaced the Trails Shop door with a code compliant and historically compatible equivalent. This project will continue to utilize the same design drawings as the Trails Shop door.

Under the supervision of the park Historical Architect, the original doors will be removed, cleaned, labeled, photo documented, and stored safely and securely on location. Photo documentation will occur before and after removal, and include storage facilities. All records will be deposited in the park archives. In addition, photographs meeting the standards of the Historic American Building Survey (HABS) will be taken prior to removal, including exterior elevations with the doors intact and detailed photographs of doors that are being removed. These will be submitted to HABS. The original doors will be strapped to an adjoining interior wall and encased with a framed and sheeted wall to minimize exposure. Signs will be affixed to the protective cover and the doors, alerting their historical value to the building and instructing that they shall not be moved or discarded. The replacements for the five doors will be designed to match the existing doors as closely as possible, including window sizing and placement and exterior wall and door treatments. Final design of these doors will be approved by the park Historical Architect.

Project Locations:

Mariposa County, CA

Mitigations:

- Ensure park historical architect is consulted on final door design.
- Coordinate with park historical architect to correctly remove and retain the original doors on site.

Describe the category used to exclude action from further NEPA analysis and indicate the number of the category (see Section 3-4 of DO-12):

C.4 Routine maintenance and repairs to cultural resource sites, structures, utilities and grounds under an approved Historic Structures Preservation Guide or Cyclic Maintenance Guide; or if the action would not adversely affect the cultural resource.

On the basis of the environmental impact information in the statutory compliance file, with which I am familiar, I am categorically excluding the described project from further NEPA analysis. No exceptional circumstances (e.g. all boxes in the ESF are marked "no") or conditions in Section 3-6 apply, and the action is fully described in Section 3-4 of DO-12.
