A. PROJECT INFORMATION

Title: Mono Pass Trail/Golden Crown Mine Wayside Exhibit

Location: Tioga Pass Road, Tuolumne County, California

Project Manager: Charles Palmer, Resources Management and Science, Yosemite National Park

B. PROJECT DESCRIPTION AND BACKGROUND

The Golden Crown Mine cabins are the best preserved reminders within Yosemite of the short-lived silver boom in the Tioga Mining District. Orlando Fuller established this camp on the windswept site at the head of Bloody Canyon in 1879, overlooking the historic Mono Trail. This remote location and lack of obvious National Park Service management gives the impression that the site has been forgotten. Hikers have already caused damage to the cabins by building fires and disposing of trash inside them. The cabins are presently at risk of being completely lost due to intentional or accidental misuse.

The project proposes a wayside display that will explain the historic significance of the mine site, and encourage visitors to participate in its protection. The display will be placed with existing interpretive exhibits outside of the designated wilderness zone at the Mono Pass Trail trailhead. The wayside panel will measure 30" wide x 19.5" high. The overall height of the panel is approximately 3'. The panel installation requires one post hole to be dug and a concrete footer poured. It will be within the road prism in a previously disturbed area. The post hole will be 18" by 12" by 22" (deep).

A. DESCRIPTION OF UNDERTAKING

Title: Mono Pass Trail/Golden Crown Mine Wayside Exhibit

Project Location and Area of Potential Effect:

Dana Meadow, Tuolumne County, California

Mono Pass Trail Head Parking Lot

Project Manager: Charles Palmer, Resources Management and Science, Yosemite National Park

Project Description: The Golden Crown Mine cabins are the best preserved reminders within Yosemite of the short-lived silver boom in the Tioga Mining District. Orlando Fuller established this camp on the windswept site at the head of Bloody Canyon in 1879, overlooking the historic Mono Trail. This remote location and lack of obvious National Park Service management gives the impression that the site has been forgotten. Hikers have already caused damage to the cabins by building fires and disposing of trash inside them. The cabins are presently at risk of being completely lost due to intentional or accidental misuse.

The project proposes a wayside display that will explain the historic significance of the mine site, and encourage visitors to participate in its protection. The display will be placed with existing interpretive exhibits outside of the designated wilderness zone at the Mono Pass Trail trailhead. The wayside panel will measure 30" wide x 19.5" high. The overall height of the panel is approximately 3'. The panel installation requires one post hole to be dug and a concrete footer poured. It will be within the road prism in a previously disturbed area. The post hole will be 18" by 12" by 22" (deep).
