A. PROJECT INFORMATION

Project Title: Maintain Historical Plantings around the Sunset Beach Education Center
PEPC Project Number: 105760
PMIS Number:
Project Type: Resource Management (RM)
Project Location:
County, State: Clatsop, Oregon **District, Section:** 01,
Project Leader: Carla Cole

B. PROJECT DESCRIPTION

Years of neglect have caused the landscaping around the Yeon house to become terribly overgrown and weedy. Mature shrubs and tree specimens are in great need of multiple years of pruning to get them back into good shape. Some specimens will need to be replaced entirely. Beds of annuals have been overgrown with weeds and need to be replanted. Both the Yeon house, also known as the Sunset Beach Education Center, and it's surrounding landscaped grounds, were deemed ineligible for listing as historic properties under the National Register. There is currently no management plan for the property. The proposed work will spruce up the grounds while a long term management plan is being developed.

Area of potential effects (as defined in 36 CFR 800.16[d])
Historically planted horticultural vegetation around Yeon house at Sunset Beach unit, LEWI, near Warrenton, OR. Work will occur on a series of dune ridges that have been altered (flattened) for construction of the house and related features.
Section 16, Township 7 North, Range 10 West Willamette Meridian.

3. Has the area of potential effects been surveyed to identify historic properties?

4. Potentially Affected Resource(s):

Archeological Resources Present: Yes

Archeological Resources Notes: In 2011 Auger hole LEWI 2011-A01 intersected a buried A Horizon and

cultural remains during investigations. From 89-108 cm below surface, the excavator found 8 calcined bone fragments, 10 fire cracked rock pieces, and 9 fragments of charcoal during screening in the 1/8 in mesh. Eight shovel probes were placed at intervals of 7.5 m and 15 m to narrow the site boundary, but no cultural material was encountered in these probes. Crews recorded the cultural remains as an isolate. Site #: 35CLT133, Yeon South Site.

4. Stipulations and Conditions: Following are listed any stipulations or conditions necessary to ensure that the assessment of effect above is consistent with 36 CFR Part 800 criteria of effect or to avoid or reduce potential adverse effects.

Landscape maintenance should maintain the historic conditions (ca. 1960s). The park archaeologist will be alerted prior to any ground disturbance over a depth of 1 ft. (30 cm).

5. Mitigations/Treatment Measures: Measures to prevent or minimize loss or impairment of historic/prehistoric properties: (Remember that setting, location, and use may be relevant.)

No Assessment of Effect mitigations identified.

6. Assessment of Effect Notes:

Although the Yeon house has not been determined eligible for the National Register and no cultural landscape identified, the park manages the property as though both were present.

The project does not include ground disturbance to a significant depth. The material culture remains documented occurred at a significant depth (over 80 cm BS) and, therefore, the project is not likely to impact archaeological resources.

Previous consultations for other work at the property have not identified any sensitive sites.
