United States Department of the Interior

NATIONAL PARK SERVICE

Yosemite National Park
P. O. Box 577
Yosemite, California 95389

Memorandum

To: Tony Brochini, Project Manager

From: Acting Superintendent, Yosemite National Park

Subject: NEPA and NHPA Clearance: 2008-087 Programmatic Parkwide, Routine Maintenance and Repair of Historic Buildings/Structures 2009-2013 (22760)

The Management Team has reviewed the proposed project/action and completed its environmental assessment documentation, and we have determined that there:

- Will not be any effect on threatened, endangered, or rare species and/or their critical habitat.
- Will not be any effect on historical, cultural, or archeological resources.
- Will not be serious or long-term undesirable environmental or visual effects.

The subject proposed project, therefore, is now cleared for all NEPA and NHPA compliance requirements as presented above. Project plans and specifications are approved and construction and/or project implementation can commence.

For the proposed project actions to be within compliance requirements during construction and/or project implementation, the following mitigations must be adhered to:

- Ensure that all equipment and materials brought into the park are free of non-native, invasive plants and animals, and noxious weeds. All staff working on site shall be informed of and follow best management practices for preventing the introduction and spread of non-native, invasive species as described in Division 1 Specifications, Section 1335.
- No adverse effect determination is contingent upon implementation of Required Mitigation Measures stated under the heading of Cultural Resources in the 2009-2013 Programmatic Parkwide, Routine Maintenance and Repair of Historic Buildings/Structure project description for historic buildings, structures, landscape features, and archeology.

Categorical Exclusion Form

Project: **2008-87 Programmatic Parkwide, Routine Maintenance and Repair of Historic Buildings/Structures 2009-2013**

PEPC ID (PIN): **22760**

Project Description:

This categorical exclusion document (CE) will serve as a formal record for routine maintenance and repairs to historic buildings and structures for the years 2009-2013. The Council on Environmental Quality (CEQ) directs agencies to use CEs for actions “which do not individually or cumulatively have a significant effect on the human environment and which are therefore exempt from requirements to prepare an environmental impact statement” (40 CFR §1500-1508). This project is categorically exempt under NPS Director’s Order #12, Action 3.4 C(4): *Routine maintenance and repairs to cultural resource sites, structures, utilities, and grounds if the action falls under an approved Historic Structures Preservation Guide or Cyclic Maintenance Guide, or if the action would not adversely affect the cultural resource.*

The activities covered by this programmatic CE are intended to fulfill the 2001 NPS Management Policies, which state, “the Service will conduct a program of preventive and rehabilitative maintenance and preservation to (1) provide a safe, sanitary, environmentally protective, and esthetically pleasing environment for park visitors and employees; (2) protect the physical integrity of facilities; and (3) preserve or maintain facilities in their optimum sustainable condition to the greatest extent possible.”

This CE is intended to cover routine interior and exterior maintenance within the developed footprint of historic buildings and structures. Repair and maintenance activities covered by this CE include door, window, and siding repair or replacement, masonry, plumbing, mechanical and electrical repairs, roof and porch repair, painting, floor covering installation, and pest control. This CE does not cover any modifications to historic buildings and structures. All maintenance and repair activities are limited to replacement in kind only, except as detailed below. Replacement in kind is defined by the Secretary of the Interior’s standards for the Treatment of Historic Properties as: with the same material, matching the old material that was present during the period of significance, “both physically and visually,” such as species, type, composition, and texture of the historic fabric.

Consultation Procedures

This programmatic CE is subject to annual review. Project proponents and responsible parties will submit an annual workplan for all routine work performed under this programmatic CE each year to the Environmental Planning and Compliance Office (EPCO). Consultation with the appropriate subject-matter experts in the Resources Management and Science Division (RMS) should also occur at this time. For routine maintenance activities not in the annual workplan, appropriate subject-matter experts will be

contacted, as necessary. A record of all maintenance and repairs done the previous year will also be submitted annually.

Work performed under this CE must apply the techniques, protocols, and methodologies described below. Work must also occur without significant changes in technology, location, capacity, or appearance. Any new techniques, etc., or significant changes in the scope of work would trigger consultation with EPCO for review, including any requests for an amendment to the CE to cover the proposed changes. The standard for determining a significant change is based on the potential for increasing environmental impacts, as determined by the Environmental Screening Form (ESF), attached.

Required Mitigation Measures

The Buildings and Grounds Branch (B&G) must implement, in consultation with the park subject matter experts, the following overarching conditions in order to minimize potential impacts to a level of insignificance. Mitigation measures applicable to specific activities are listed below, under Routine Historic Building/Structure Maintenance and Repair Activities.

Natural Resources

- The approval of all routine maintenance activities is contingent upon avoidance of special status species. B&G personnel are responsible for coordination of activities with the park Branch Chief of Wildlife Management and the park Branch Chief of Vegetation and Ecological Restoration in RMS to ensure the protection of natural resources.
- B&G will consult with the park Branch Chief of Wildlife Management when maintenance activities could occur in an area that may affect sensitive species, such as nesting birds. Where potential to disrupt wildlife exists, e.g., bird nesting or bat habitat, the park ornithologist will be consulted. This may include attics and old or uninhabited houses and garages.
- Establishment of off-site staging areas on non-hardened surfaces requires consultation with the park Branch Chief of Vegetation and Ecological Restoration.
- If tree limbs, boles, or roots will be affected, the park Forester will be consulted prior to work.

Cultural Resources

- The approval of all maintenance on historic buildings and structures is contingent upon a determination of no adverse impact to cultural resources. B&G is responsible for coordination of activities with the park Archeologist, the park Branch Chief of History, Architecture, and Landscapes (HAL), the park Historic Preservation Officer, and the park American Indian Liaison to ensure the protection of cultural resources.
- Establishment of off-site staging areas on non-hardened surfaces requires consultation with cultural resource specialists.
- Maintenance activities on all historic buildings and structures require annual review and approval by the Historic Preservation Exhibits Specialist, HAL staff, and the Archeology and Anthropology Branch staff. Work will be described in the annual workplan and reviews will occur as part of the annual workplan review. Review will ensure that all repairs are made in kind using proper materials and methods, and will protect and preserve the historic character of the

buildings. All work will require before and after photo-documentation.

- All routine maintenance and facilities work will be done in accordance with recommendations from *A Sense of Place: Design Guidelines for Yosemite Valley and Yosemite National Park* (document forthcoming).
- Repairs, replacement, and upgrading of facilities to meet code will only occur when: materials are replaced in kind, non-original fixtures are replaced, or repairs maintain the historical character of the period of significance, and upgrades do not damage historic materials. All work complies with the Secretary of the Interior's Standards for the Treatment of Historic Properties.

Wild and Scenic River Corridors and Tributaries

The approval of all building and structure maintenance activities within a wild and scenic river corridor is contingent upon a determination of no adverse impact to the outstandingly remarkable values of the Merced Wild and Scenic River and the Tuolumne Wild and Scenic River. B&G staff is responsible for coordination of activities with EPCO to ensure the protection of these values.

Building/Structure Maintenance and Repair Activities

Work covered by this programmatic CE includes, but is not limited to, the activities listed below. Additional activities not listed below may also be covered as long as they are of a similar scope of work. All work covered under this CE will be done in accordance with applicable codes. Standard construction tools and equipment will be used in all work, and include portable power and hand tools.

Underground Service Alert (USA Dig) will be contacted a minimum of 48 hours prior to any planned digging to locate utilities. At this time, RMS will be notified to identify the potential to affect archeological sites and to develop appropriate treatment measures, if necessary (this includes previously disturbed areas).

Appliances: Work consists of replacing or upgrading existing appliances. Appliances are not required to be replaced in kind as long as replacement or upgrading does not adversely affect the character of the structure or the surrounding historic materials.

Carpentry: Work consists of repairing interiors and exteriors of existing structures, when the repair or replacement is done in kind to match the existing materials and form, and to maintain the historical character of the period of significance. Replacement will only be done when original material is not repairable or is missing, and will be done in consultation with HAL staff and the Historic Preservation Exhibits Specialist.

Electrical work: Work consists of replacing non-original fixtures, repairs that maintain the historical character of the period of significance, and upgrades that do not damage historic materials, such as siding or walls. Electrical devices are not required to be replaced in kind, as long as replacement or upgrading does not adversely affect the character of the structure or the surrounding historic materials.

Fencing: Work consists of repairing and replacing in kind existing fencing within the existing footprint.

Floor coverings: Work consists of installing floor covering materials where installation does not involve damage to historic material. Floor covering will be chosen in consultation with HAL staff and the Historic Preservation Exhibits Specialist. Appearance must be consistent with the historic character of the period of significance, as determined by the Historic Preservation Exhibits Specialist.

Gas and propane work: Work consists of replacing non-original fixtures, repairs that maintain the historical character of the period of significance, and upgrades that do not damage historic materials, such as siding or walls. Gas and propane delivery systems are not required to be replaced in kind, as long as replacement or upgrading does not adversely affect the character of the structure or the surrounding historic materials.

HVAC work: Work consists of filter replacement; furnace and air conditioner repairs and replacement; and repair and replacement of wood stoves. Heating and cooling units are not required to be replaced in kind as long as replacement or upgrading does not adversely affect the character of the structure or the surrounding historic materials.

Insulation: Work consists of replacing or upgrading existing batt, blown-in, and pipe insulation.

Masonry: Work consists of repairing existing structures, when the repair or replacement is done in kind to match the existing materials and form, and to maintain the historical character of the period of significance. Replacement will only be done when original material is not repairable or is missing, and will be done in consultation with HAL staff and the Historic Preservation Exhibits Specialist.

Painting: Work consists of interior and exterior painting. Paint will be chosen in consultation with HAL staff and the Historic Preservation Exhibits Specialist. Appearance must be consistent with the historic character of the period of significance, as determined by the Historic Preservation Exhibits Specialist.

Pest control: Work consists of non-ground-disturbing treatments for pest exclusion and control that do not involve damage to historic building materials. Only pesticides approved by the Safety Office will be used.

Plumbing: Work consists of replacing non-original fixtures, repairs that maintain the historical character of the period of significance, and upgrades that do not damage historic materials, such as siding or walls. Plumbing features are not required to be replaced in kind, as long as replacement or upgrading does not adversely affect the character of the structure or the surrounding historic materials.

Porch and walkway work: Work consists of repairs to existing exterior structures, such as walkways, porches, patios, stairs, stoops, and landings, when the repair or replacement is done in kind to match the existing materials and form, and to maintain the historical character of the period of significance. Replacement will only be done when original material is not repairable or is missing, and will be done in consultation with HAL staff and the Historic Preservation Exhibits Specialist.

Roofing: Roofing activities require an initial consultation with HAL staff and the Historic Preservation Exhibits Specialist prior to the start of work, to determine the original material. Then, repair or replacement is done in kind or according to the determination, to maintain the historical character of the period of significance.

Window covering: Work includes replacement in kind of existing window coverings.

Project Locations:

Mariposa County, CA
Tuolumne County, CA

Mitigations:

- **Ensure that all equipment and materials brought into the park are free of non-native, invasive plants and animals, and noxious weeds. All staff working on site shall be informed of and follow best management practices for preventing the introduction and spread of non-native, invasive species as described in Division 1 Specifications, Section 1335.**
- **No adverse effect determination is contingent upon implementation of Required Mitigation Measures stated under the heading of Cultural Resources in the 2009-2013 Programmatic Parkwide, Routine Maintenance and Repair of Historic Buildings/Structure Project Description for historic buildings, structures, landscape features, and archeology.**

Describe the category used to exclude action from further NEPA analysis and indicate the number of the category (see Section 3-4 of DO-12):

C.4 Routine maintenance and repairs to cultural resource sites, structures, utilities and grounds under an approved Historic Structures Preservation Guide or Cyclic Maintenance Guide; or if the action would not adversely affect the cultural resource.

On the basis of the environmental impact information in the statutory compliance file, with which I am familiar, I am categorically excluding the described project from further NEPA analysis. No exceptional circumstances (e.g. all boxes in the ESF are marked "no") or conditions in Section 3-6 apply, and the action is fully described in Section 3-4 of DO-12.

B. PROJECT DESCRIPTION

This categorical exclusion document (CE) will serve as a formal record for routine maintenance and repairs to historic buildings and structures for the years 2009-2013. The Council on Environmental Quality (CEQ) directs agencies to use CEs for actions "which do not individually or cumulatively have a significant effect on the human environment and which are therefore exempt from requirements to prepare an environmental impact statement" (40 CFR §1500-1508). This project is categorically exempt under NPS Director's Order #12, Action 3.4 C(4): *Routine maintenance and repairs to cultural resource sites, structures, utilities, and grounds if the action falls under an approved Historic Structures Preservation Guide or Cyclic Maintenance Guide, or if the action would not adversely affect the cultural resource.*

The activities covered by this programmatic CE are intended to fulfill the 2001 NPS Management Policies, which state, "the Service will conduct a program of preventive and rehabilitative maintenance and preservation to (1) provide a safe, sanitary, environmentally protective, and esthetically pleasing environment for park visitors and employees; (2) protect the physical integrity of facilities; and (3) preserve or maintain facilities in their optimum sustainable condition to the greatest extent possible."

This CE is intended to cover routine interior and exterior maintenance within the developed footprint of historic buildings and structures. Repair and maintenance activities covered by this CE include door, window, and siding repair or replacement, masonry, plumbing, mechanical and electrical repairs, roof and porch repair, painting, floor covering installation, and pest control. This CE does not cover any modifications to historic buildings and structures. All maintenance and repair activities are limited to

replacement in kind only, except as detailed below. Replacement in kind is defined by the Secretary of the Interior's standards for the Treatment of Historic Properties as: with the same material, matching the old material that was present during the period of significance, "both physically and visually," such as species, type, composition, and texture of the historic fabric.

Consultation Procedures

This programmatic CE is subject to annual review. Project proponents and responsible parties will submit an annual workplan for all routine work performed under this programmatic CE each year to the Environmental Planning and Compliance Office (EPCO). Consultation with the appropriate subject-matter experts in the Resources Management and Science Division (RMS) should also occur at this time. For routine maintenance activities not in the annual workplan, appropriate subject-matter experts will be contacted, as necessary. A record of all maintenance and repairs done the previous year will also be submitted annually.

Work performed under this CE must apply the techniques, protocols, and methodologies described below. Work must also occur without significant changes in technology, location, capacity, or appearance. Any new techniques, etc., or significant changes in the scope of work would trigger consultation with EPCO for review, including any requests for an amendment to the CE to cover the proposed changes. The standard for determining a significant change is based on the potential for increasing environmental impacts, as determined by the Environmental Screening Form (ESF), attached.

Required Mitigation Measures

The Buildings and Grounds Branch (B&G) must implement, in consultation with the park subject matter experts, the following overarching conditions in order to minimize potential impacts to a level of insignificance. Mitigation measures applicable to specific activities are listed below, under Routine Historic Building/Structure Maintenance and Repair Activities.

Natural Resources

- The approval of all routine maintenance activities is contingent upon avoidance of special status species. B&G personnel are responsible for coordination of activities with the park Branch Chief of Wildlife Management and the park Branch Chief of Vegetation and Ecological Restoration in RMS to ensure the protection of natural resources.
- B&G will consult with the park Branch Chief of Wildlife Management when maintenance activities could occur in an area that may affect sensitive species, such as nesting birds. Where potential to disrupt wildlife exists, e.g., bird nesting or bat habitat, the park ornithologist will be consulted. This may include attics and old or uninhabited houses and garages.
- Establishment of off-site staging areas on non-hardened surfaces requires consultation with the park Branch Chief of Vegetation and Ecological Restoration.
- If tree limbs, boles, or roots will be affected, the park Forester will be consulted prior to work.

Cultural Resources

- The approval of all maintenance on historic buildings and structures is contingent upon a determination of no adverse impact to cultural resources. B&G is responsible for coordination of

activities with the park Archeologist, the park Branch Chief of History, Architecture, and Landscapes (HAL), the park Historic Preservation Officer, and the park American Indian Liaison to ensure the protection of cultural resources.

- Establishment of off-site staging areas on non-hardened surfaces requires consultation with cultural resource specialists.
- Maintenance activities on all historic buildings and structures require annual review and approval by the Historic Preservation Exhibits Specialist, HAL staff, and the Archeology and Anthropology Branch staff. Work will be described in the annual workplan and reviews will occur as part of the annual workplan review. Review will ensure that all repairs are made in kind using proper materials and methods, and will protect and preserve the historic character of the buildings. All work will require before and after photo-documentation.
- All routine maintenance and facilities work will be done in accordance with recommendations from *A Sense of Place: Design Guidelines for Yosemite Valley and Yosemite National Park* (document forthcoming).
- Repairs, replacement, and upgrading of facilities to meet code will only occur when: materials are replaced in kind, non-original fixtures are replaced, or repairs maintain the historical character of the period of significance, and upgrades do not damage historic materials. All work complies with the Secretary of the Interior's Standards for the Treatment of Historic Properties.

Wild and Scenic River Corridors and Tributaries

The approval of all building and structure maintenance activities within a wild and scenic river corridor is contingent upon a determination of no adverse impact to the outstandingly remarkable values of the Merced Wild and Scenic River and the Tuolumne Wild and Scenic River. B&G staff is responsible for coordination of activities with EPCO to ensure the protection of these values.

Building/Structure Maintenance and Repair Activities

Work covered by this programmatic CE includes, but is not limited to, the activities listed below. Additional activities not listed below may also be covered as long as they are of a similar scope of work. All work covered under this CE will be done in accordance with applicable codes. Standard construction tools and equipment will be used in all work, and include portable power and hand tools.

Underground Service Alert (USA Dig) will be contacted a minimum of 48 hours prior to any planned digging to locate utilities. At this time, RMS will be notified to identify the potential to affect archeological sites and to develop appropriate treatment measures, if necessary (this includes previously disturbed areas).

Appliances: Work consists of replacing or upgrading existing appliances. Appliances are not required to be replaced in kind as long as replacement or upgrading does not adversely affect the character of the structure or the surrounding historic materials.

Carpentry: Work consists of repairing interiors and exteriors of existing structures, when the repair or replacement is done in kind to match the existing materials and form, and to maintain the historical character of the period of significance. Replacement will only be done when original material is not repairable or is missing, and will be done in consultation with HAL staff and the Historic Preservation

Exhibits Specialist.

Electrical work: Work consists of replacing non-original fixtures, repairs that maintain the historical character of the period of significance, and upgrades that do not damage historic materials, such as siding or walls. Electrical devices are not required to be replaced in kind, as long as replacement or upgrading does not adversely affect the character of the structure or the surrounding historic materials.

Fencing: Work consists of repairing and replacing in kind existing fencing within the existing footprint.

Floor coverings: Work consists of installing floor covering materials where installation does not involve damage to historic material. Floor covering will be chosen in consultation with HAL staff and the Historic Preservation Exhibits Specialist. Appearance must be consistent with the historic character of the period of significance, as determined by the Historic Preservation Exhibits Specialist.

Gas and propane work: Work consists of replacing non-original fixtures, repairs that maintain the historical character of the period of significance, and upgrades that do not damage historic materials, such as siding or walls. Gas and propane delivery systems are not required to be replaced in kind, as long as replacement or upgrading does not adversely affect the character of the structure or the surrounding historic materials.

HVAC work: Work consists of filter replacement; furnace and air conditioner repairs and replacement; and repair and replacement of wood stoves. Heating and cooling units are not required to be replaced in kind as long as replacement or upgrading does not adversely affect the character of the structure or the surrounding historic materials.

Insulation: Work consists of replacing or upgrading existing batt, blown-in, and pipe insulation.

Masonry: Work consists of repairing existing structures, when the repair or replacement is done in kind to match the existing materials and form, and to maintain the historical character of the period of significance. Replacement will only be done when original material is not repairable or is missing, and will be done in consultation with HAL staff and the Historic Preservation Exhibits Specialist.

Painting: Work consists of interior and exterior painting. Paint will be chosen in consultation with HAL staff and the Historic Preservation Exhibits Specialist. Appearance must be consistent with the historic character of the period of significance, as determined by the Historic Preservation Exhibits Specialist.

Pest control: Work consists of non-ground-disturbing treatments for pest exclusion and control that do not involve damage to historic building materials. Only pesticides approved by the Safety Office will be used.

Plumbing: Work consists of replacing non-original fixtures, repairs that maintain the historical character of the period of significance, and upgrades that do not damage historic materials, such as siding or walls. Plumbing features are not required to be replaced in kind, as long as replacement or upgrading does not adversely affect the character of the structure or the surrounding historic materials.

Porch and walkway work: Work consists of repairs to existing exterior structures, such as walkways, porches, patios, stairs, stoops, and landings, when the repair or replacement is done in kind to match the existing materials and form, and to maintain the historical character of the period of significance. Replacement will only be done when original material is not repairable or is missing, and will be done in consultation with HAL staff and the Historic Preservation Exhibits Specialist.

Roofing: Roofing activities require an initial consultation with HAL staff and the Historic Preservation

Exhibits Specialist prior to the start of work, to determine the original material. Then, repair or replacement is done in kind or according to the determination, to maintain the historical character of the period of significance.

Window covering: Work includes replacement in kind of existing window coverings.

Preliminary drawings attached? **Yes**

Is project a hot topic (controversial or sensitive issues that should be brought to attention of Regional Director)? **No**

C. RESOURCE EFFECTS TO CONSIDER:

Identify potential effects to the following physical, natural, or cultural resources	No Effect	Negligible Effects	Minor Effects	Exceeds Minor Effects	Data Needed to Determine/Notes
1. Geologic resources – soils, bedrock, streambeds, etc.		X			This project only includes replacement in kind of existing features. Trenching will be done only in areas that have existing utility lines. No new ground disturbance is covered under this Categorical Exclusion (CE).
2. From geohazards	X				
3. Air quality		X			Some projects covered under this programmatic will require the use of equipment that will temporarily affect the air quality.
4. Soundscapes		X			Temporary construction noises are associated with the projects that are covered under this CE.
5. Water quality or quantity	X				
6. Streamflow characteristics	X				
7. Marine or estuarine resources	X				
8. Floodplains or wetlands	X				

9. Land use, including occupancy, income, values, ownership, type of use	X				
10. Rare or unusual vegetation – old growth timber, riparian, alpine	X				
11. Species of special concern (plant or animal; state or federal listed or proposed for listing) or their habitat	X				
12. Unique ecosystems, biosphere reserves, World Heritage Sites	X				Yosemite National Park is a World Heritage site; no historic properties would be adversely affected by implementing the projects covered under this CE.
13. Unique or important wildlife or wildlife habitat	X				
14. Unique or important fish or fish habitat	X				
15. Introduce or promote non-native species (plant or animal)		X			See Comment 1, below.
16. Recreation resources, including supply, demand, visitation, activities, etc.	X				
17. Visitor experience, aesthetic resources	X				
18. Archeological resources		X			Parkwide permit; presence or absence of resources will be determined on a site by site basis.
19. Prehistoric/historic structure		X			Parkwide permit; presence or absence of resources will be determined on a site by site basis.
20. Cultural landscapes		X			Parkwide permit; presence or absence of resources will be determined on a site by site basis.
21. Ethnographic resources		X			Parkwide permit; presence or absence of resources will be determined on a site by

					site basis.
22. Museum collections (objects, specimens, and archival and manuscript collections)	X				
23. Socioeconomics, including employment, occupation, income changes, tax base, infrastructure	X				
24. Minority and low income populations, ethnography, size, migration patterns, etc.	X				
25. Energy resources	X				
26. Other agency or tribal land use plans or policies	X				
27. Resource, including energy, conservation potential, sustainability	X				
28. Urban quality, gateway communities, etc.	X				
29. Long-term management of resources or land/resource productivity	X				This programmatic will meet the park's long-term goals of managing resources.
30. Other important environment resources (e.g. geothermal, paleontological resources)?	X				

Comments:

1. Ensure that all equipment and materials brought into the park are free of non-native, invasive plants and animals and noxious weeds. All staff working on site shall be informed of and follow best management practices for preventing the introduction and spread of non-native species, as described in Division 1 Specification, Section 1335.

D. MANDATORY CRITERIA

Mandatory Criteria: If implemented, would the proposal:	Yes	No	N/A	Comment or Data Needed to Determine
A. Have significant impacts on public health or safety?		X		
B. Have significant impacts on such natural resources and unique geographic characteristics as historic or cultural resources; park, recreation, or refuge		X		Mitigated; the assessment of effect is "No Adverse Effect."

lands; wilderness areas; wild or scenic rivers; national natural landmarks; sole or principal drinking water aquifers; prime farmlands; wetlands (Executive Order 11990); floodplains (Executive Order 11988); national monuments; migratory birds; and other ecologically significant or critical areas?				
C. Have highly controversial environmental effects or involve unresolved conflicts concerning alternative uses of available resources (NEPA section 102(2)(E))?		X		
D. Have highly uncertain and potentially significant environmental effects or involve unique or unknown environmental risks?		X		
E. Establish a precedent for future action or represent a decision in principle about future actions with potentially significant environmental effects?		X		
F. Have a direct relationship to other actions with individually insignificant, but cumulatively significant, environmental effects?		X		
G. Have significant impacts on properties listed or eligible for listing on the National Register of Historic Places, as determined by either the bureau or office?		X		
H. Have significant impacts on species listed or proposed to be listed on the List of Endangered or Threatened Species, or have significant impacts on designated Critical Habitat for these species?		X		
I. Violate a federal law, or a state, local, or tribal law or requirement imposed for the protection of the environment?		X		
J. Have a disproportionately high and adverse effect on low income or minority populations (Executive Order 12898)?		X		
K. Limit access to and ceremonial use of Indian sacred sites on federal lands by Indian religious practitioners or significantly adversely affect the physical integrity of such sacred sites (Executive Order 13007)?		X		
L. Contribute to the introduction, continued existence, or spread of noxious weeds or non-native invasive species		X		

known to occur in the area or actions that may promote the introduction, growth, or expansion of the range of such species (Federal Noxious Weed Control Act and Executive Order 13112)?				
--	--	--	--	--

For the purpose of interpreting these procedures within the NPS, any action that has the potential to violate the NPS Organic Act by impairing park resources or values would constitute an action that triggers the DOI exception for actions that threaten to violate a federal law for protection of the environment.

E. OTHER INFORMATION

Are personnel preparing this form familiar with the site? **Yes**

Did personnel conduct a site visit? **No**

Is the project in an approved plan such as a General Management Plan or an Implementation Plan with an accompanying NEPA document? **No**

Are there any interested or affected agencies or parties? **No**

Has consultation with all affected agencies or tribes been completed? **No**

Are there any connected, cumulative, or similar actions as part of the proposed action? (e.g., other development projects in area or identified in GMP, adequate/available utilities to accomplish project)? **No**

ASSESSMENT OF ACTIONS HAVING AN EFFECT ON CULTURAL RESOURCES

A. DESCRIPTION OF UNDERTAKING

1. Park: **Yosemite NP** Park District: **Parkwide**

2. Project Description:

a. Project Name: **2008-087 Programmatic Parkwide, Routine Maintenance and Repair of Historic Buildings/Structures 2009-2013** Date: **June 25, 2009** PEPC Project ID Number: **22760**

b. Describe project and area of potential effects (as defined in 36 CFR 800.2[c])

This categorical exclusion document (CE) will serve as a formal record for routine maintenance and repairs to historic buildings and structures for the years 2009-2013. The Council on Environmental Quality (CEQ) directs agencies to use CEs for actions “which do not individually or cumulatively have a significant effect on the human environment and which are therefore exempt from requirements to prepare an environmental impact statement” (40 CFR §1500-1508). This project is categorically exempt under NPS Director’s Order #12, Action 3.4 C(4): *Routine maintenance and repairs to cultural resource sites, structures, utilities, and grounds if the action falls under an approved Historic Structures Preservation Guide or Cyclic Maintenance Guide, or if the action would not adversely affect the cultural resource.*

The activities covered by this programmatic CE are intended to fulfill the 2001 NPS Management Policies, which state, “the Service will conduct a program of preventive and rehabilitative maintenance and preservation to (1) provide a safe, sanitary, environmentally protective, and esthetically pleasing environment for park visitors and employees; (2) protect the physical integrity of facilities; and (3) preserve or maintain facilities in their optimum sustainable condition to the greatest extent possible.”

This CE is intended to cover routine interior and exterior maintenance within the developed footprint of historic buildings and structures. Repair and maintenance activities covered by this CE include door, window, and siding repair or replacement, masonry, plumbing, mechanical and electrical repairs, roof and porch repair, painting, floor covering installation, and pest control. This CE does not cover any modifications to historic buildings and structures. All maintenance and repair activities are limited to replacement in kind only, except as detailed below. Replacement in kind is defined by the Secretary of the Interior’s standards for the Treatment of Historic Properties as: with the same material, matching the old material that was present during the period of significance, “both physically and visually,” such as species, type, composition, and texture of the historic fabric.

Consultation Procedures

This programmatic CE is subject to annual review. Project proponents and responsible parties will submit an annual workplan for all routine work performed under this programmatic CE each year to the Environmental Planning and Compliance Office (EPCO). Consultation with the appropriate subject-

matter experts in the Resources Management and Science Division (RMS) should also occur at this time. For routine maintenance activities not in the annual workplan, appropriate subject-matter experts will be contacted, as necessary. A record of all maintenance and repairs done the previous year will also be submitted annually.

Work performed under this CE must apply the techniques, protocols, and methodologies described below. Work must also occur without significant changes in technology, location, capacity, or appearance. Any new techniques, etc., or significant changes in the scope of work would trigger consultation with EPCO for review, including any requests for an amendment to the CE to cover the proposed changes. The standard for determining a significant change is based on the potential for increasing environmental impacts, as determined by the Environmental Screening Form (ESF), attached.

Required Mitigation Measures

The Buildings and Grounds Branch (B&G) must implement, in consultation with the park subject matter experts, the following overarching conditions in order to minimize potential impacts to a level of insignificance. Mitigation measures applicable to specific activities are listed below, under Routine Historic Building/Structure Maintenance and Repair Activities.

Natural Resources

- The approval of all routine maintenance activities is contingent upon avoidance of special status species. B&G personnel are responsible for coordination of activities with the park Branch Chief of Wildlife Management and the park Branch Chief of Vegetation and Ecological Restoration in RMS to ensure the protection of natural resources.
- B&G will consult with the park Branch Chief of Wildlife Management when maintenance activities could occur in an area that may affect sensitive species, such as nesting birds. Where potential to disrupt wildlife exists, e.g., bird nesting or bat habitat, the park ornithologist will be consulted. This may include attics and old or uninhabited houses and garages.
- Establishment of off-site staging areas on non-hardened surfaces requires consultation with the park Branch Chief of Vegetation and Ecological Restoration.
- If tree limbs, boles, or roots will be affected, the park Forester will be consulted prior to work.

Cultural Resources

- The approval of all maintenance on historic buildings and structures is contingent upon a determination of no adverse impact to cultural resources. B&G is responsible for coordination of activities with the park Archeologist, the park Branch Chief of History, Architecture, and Landscapes (HAL), the park Historic Preservation Officer, and the park American Indian Liaison to ensure the protection of cultural resources.
- Establishment of off-site staging areas on non-hardened surfaces requires consultation with cultural resource specialists.
- Maintenance activities on all historic buildings and structures require annual review and approval by the Historic Preservation Exhibits Specialist, HAL staff, and the Archeology and Anthropology Branch staff. Work will be described in the annual workplan and reviews will

occur as part of the annual workplan review. Review will ensure that all repairs are made in kind using proper materials and methods, and will protect and preserve the historic character of the buildings. All work will require before and after photo-documentation.

- All routine maintenance and facilities work will be done in accordance with recommendations from *A Sense of Place: Design Guidelines for Yosemite Valley and Yosemite National Park* (document forthcoming).
- Repairs, replacement, and upgrading of facilities to meet code will only occur when: materials are replaced in kind, non-original fixtures are replaced, or repairs maintain the historical character of the period of significance, and upgrades do not damage historic materials. All work complies with the Secretary of the Interior's Standards for the Treatment of Historic Properties.

Wild and Scenic River Corridors and Tributaries

The approval of all building and structure maintenance activities within a wild and scenic river corridor is contingent upon a determination of no adverse impact to the outstandingly remarkable values of the Merced Wild and Scenic River and the Tuolumne Wild and Scenic River. B&G staff is responsible for coordination of activities with EPCO to ensure the protection of these values.

Building/Structure Maintenance and Repair Activities

Work covered by this programmatic CE includes, but is not limited to, the activities listed below. Additional activities not listed below may also be covered as long as they are of a similar scope of work. All work covered under this CE will be done in accordance with applicable codes. Standard construction tools and equipment will be used in all work, and include portable power and hand tools.

Underground Service Alert (USA Dig) will be contacted a minimum of 48 hours prior to any planned digging to locate utilities. At this time, RMS will be notified to identify the potential to affect archeological sites and to develop appropriate treatment measures, if necessary (this includes previously disturbed areas).

Appliances: Work consists of replacing or upgrading existing appliances. Appliances are not required to be replaced in kind as long as replacement or upgrading does not adversely affect the character of the structure or the surrounding historic materials.

Carpentry: Work consists of repairing interiors and exteriors of existing structures, when the repair or replacement is done in kind to match the existing materials and form, and to maintain the historical character of the period of significance. Replacement will only be done when original material is not repairable or is missing, and will be done in consultation with HAL staff and the Historic Preservation Exhibits Specialist.

Electrical work: Work consists of replacing non-original fixtures, repairs that maintain the historical character of the period of significance, and upgrades that do not damage historic materials, such as siding or walls. Electrical devices are not required to be replaced in kind, as long as replacement or upgrading does not adversely affect the character of the structure or the surrounding historic materials.

Fencing: Work consists of repairing and replacing in kind existing fencing within the existing footprint.

Floor coverings: Work consists of installing floor covering materials where installation does not involve damage to historic material. Floor covering will be chosen in consultation with HAL staff and the Historic

Preservation Exhibits Specialist. Appearance must be consistent with the historic character of the period of significance, as determined by the Historic Preservation Exhibits Specialist.

Gas and propane work: Work consists of replacing non-original fixtures, repairs that maintain the historical character of the period of significance, and upgrades that do not damage historic materials, such as siding or walls. Gas and propane delivery systems are not required to be replaced in kind, as long as replacement or upgrading does not adversely affect the character of the structure or the surrounding historic materials.

HVAC work: Work consists of filter replacement; furnace and air conditioner repairs and replacement; and repair and replacement of wood stoves. Heating and cooling units are not required to be replaced in kind as long as replacement or upgrading does not adversely affect the character of the structure or the surrounding historic materials.

Insulation: Work consists of replacing or upgrading existing batt, blown-in, and pipe insulation.

Masonry: Work consists of repairing existing structures, when the repair or replacement is done in kind to match the existing materials and form, and to maintain the historical character of the period of significance. Replacement will only be done when original material is not repairable or is missing, and will be done in consultation with HAL staff and the Historic Preservation Exhibits Specialist.

Painting: Work consists of interior and exterior painting. Paint will be chosen in consultation with HAL staff and the Historic Preservation Exhibits Specialist. Appearance must be consistent with the historic character of the period of significance, as determined by the Historic Preservation Exhibits Specialist.

Pest control: Work consists of non-ground-disturbing treatments for pest exclusion and control that do not involve damage to historic building materials. Only pesticides approved by the Safety Office will be used.

Plumbing: Work consists of replacing non-original fixtures, repairs that maintain the historical character of the period of significance, and upgrades that do not damage historic materials, such as siding or walls. Plumbing features are not required to be replaced in kind, as long as replacement or upgrading does not adversely affect the character of the structure or the surrounding historic materials.

Porch and walkway work: Work consists of repairs to existing exterior structures, such as walkways, porches, patios, stairs, stoops, and landings, when the repair or replacement is done in kind to match the existing materials and form, and to maintain the historical character of the period of significance. Replacement will only be done when original material is not repairable or is missing, and will be done in consultation with HAL staff and the Historic Preservation Exhibits Specialist.

Roofing: Roofing activities require an initial consultation with HAL staff and the Historic Preservation Exhibits Specialist prior to the start of work, to determine the original material. Then, repair or replacement is done in kind or according to the determination, to maintain the historical character of the period of significance.

Window covering: Work includes replacement in kind of existing window coverings.

3. Has the area of potential effects been surveyed to identify cultural resources?

 No

 Yes, Source or reference: **Park wide APE**

 Check here if no known cultural resources will be affected. (If this is because area has been disturbed, please explain or attach additional information to show the disturbance was so extensive as to preclude intact cultural deposits.)

4. Potentially Affected Resources:

Archeological resources affected?

Name and number(s): **Park-Wide permit; presence/absence of resources determined on a site by site basis.**

Historical structures/resources affected?

Name and number(s): **Park-Wide permit; presence/absence of resources determined on a site by site basis.**

Cultural landscapes affected?

Name and number(s): **Park-Wide permit; presence/absence of resources determined on a site by site basis.**

Ethnographic resources affected?

Name and number(s): **Park-Wide permit; presence/absence of resources determined on a site by site basis.**

5. The proposed action will: (check as many as apply)

 No Destroy, remove, or alter features/elements from a historic structure

 Yes Replace historic features/elements in kind

 No Add non-historic features/elements to a historic structure

 No Alter or remove features/elements of a historic setting or environment (inc. terrain)

 No Add non-historic features/elements (inc. visual, audible, or atmospheric) to a historic setting or cultural landscape

 No Disturb, destroy, or make archeological resources inaccessible

 No Disturb, destroy, or make ethnographic resources inaccessible

 Yes Potentially affect presently unidentified cultural resources

 No Begin or contribute to deterioration of historic features, terrain, setting, landscape elements, or archeological or ethnographic resources

 No Involve a real property transaction (exchange, sale, or lease of land or structures)

 Other (please specify)

6. Measures to prevent or minimize loss or impairment of historic/prehistoric properties:
(Remember that setting, location, and use may be relevant.)

- **No adverse effect determination is contingent upon implementation of Required Mitigation Measures stated under the heading of Cultural Resources in the 2009-2013 Programmatic Parkwide, Routine Maintenance and Repair of Historic Buildings/Structure Project Description for historic buildings, structures, landscape features, and archeology.**

7. Supporting Study Data:

(Attach if feasible; if action is in a plan, EA or EIS, give name and project or page number.)

8. Attachments:

☐ Maps ☐ Archeological survey, if applicable ☐ Drawings ☐ Specifications ☐ Photographs
☐ Scope of Work ☐ Site plan ☐ List of Materials ☐ Samples ☐ Other:

B. REVIEWS BY CULTURAL RESOURCE SPECIALISTS

The park 106 coordinator requested review by the park's cultural resource specialist/advisors as indicated by check-off boxes or as follows:

☒ Archeologist

Name: **Laura Kirn**

Date: **04/14/2009**

Comments: **YOSE PA, Stipulation VII.C.2**

Check if project does not involve ground disturbance ☐

Assessment of Effect: ☐ No Historic Properties Affected ☒ No Adverse Effect ☐ Adverse Effect ☐ Streamlined Review

Recommendations for conditions or stipulations:

Doc Method: **Park Specific Programmatic Agreement**

☒ Historical Architect

Name: **Sueann Brown**

Date: **06/09/2009**

Comments:

Check if project does not involve ground disturbance ☐

Assessment of Effect: ☐ No Historic Properties Affected ☒ No Adverse Effect ☐ Adverse Effect ☐ Streamlined Review

Recommendations for conditions or stipulations:

Doc Method: **Park Specific Programmatic Agreement**

[☒] 106 Advisor

Name: **Jeannette Simons**

Date: **06/25/2009**

Comments: **No adverse effect determination is contingent upon implementation of Required Mitigation Measures stated under the heading of Cultural Resources in the 2009-2013 Programmatic Parkwide, Routine Maintenance and Repair of Historic Buildings/Structure Project Description for historic buildings, structures, landscape features, and archeology.**

Check if project does not involve ground disturbance [☐]

Assessment of Effect: ☐ No Historic Properties Affected ☒ No Adverse Effect ☐ Adverse Effect ☐ Streamlined Review

Recommendations for conditions or stipulations:

Doc Method: **Park Specific Programmatic Agreement**

[☒] Historical Landscape Architect

Name: **David Humphrey**

Date: **05/27/2009**

Comments: **YOSE 1999 PA, Stipulation VII.C.2**

Check if project does not involve ground disturbance [☐]

Assessment of Effect: ☐ No Historic Properties Affected ☒ No Adverse Effect ☐ Adverse Effect ☐ Streamlined Review

Recommendations for conditions or stipulations: **None.**

Doc Method: **Park Specific Programmatic Agreement**

No Reviews From: **Curator, Historian, Other Advisor, Anthropologist**

C. PARK SECTION 106 COORDINATOR'S REVIEW AND RECOMMENDATIONS

1. Assessment of Effect:

☐ No Historic Properties Affected ☒ No Adverse Effect ☐ Adverse Effect

2. Compliance requirements:

[☐] A. STANDARD 36 CFR PART 800 CONSULTATION

Further consultation under 36 CFR Part 800 is needed.

[☐] B. STREAMLINED REVIEW UNDER THE 2008 SERVICEWIDE PROGRAMMATIC AGREEMENT (PA)

The above action meets all conditions for a streamlined review under section III of the 2008 Servicewide PA for Section 106 compliance.

APPLICABLE STREAMLINED REVIEW Criteria
(Specify 1-16 of the list of streamlined review criteria.)

☐ C. PLAN-RELATED UNDERTAKING

Consultation and review of the proposed undertaking were completed in the context of a plan review process, in accordance with the 2008 Servicewide PA and 36 CFR Part 800.

Specify plan/EA/EIS: _____

☒ D. UNDERTAKING RELATED TO ANOTHER AGREEMENT

The proposed undertaking is covered for Section 106 purposes under another document such as a statewide agreement established in accord with 36 CFR 800.7 or counterpart regulations.

Specify: 1999 PA_____

☐ E. COMPLIANCE REQUIREMENTS SATISFIED BY USE OF NEPA

Documentation is required for the preparation of an EA/FONSI or an EIS/ROD has been developed and used so as also to meet the requirements of 36 CFR 800.3 through 800.6

☐ F. No Potential to Cause Effects [800.3(a) (1)]

☐ G. STIPULATIONS/CONDITIONS

Following are listed any stipulations or conditions necessary to ensure that the assessment of effect above is consistent with 36 CFR Part 800 criteria of effect or to avoid or reduce potential adverse effects.

Recommended by Park Section 106 coordinator:

Signature of Historic Preservation Officer //Jeannette Simons//_____

Date: 8/11/09_____

D. SUPERINTENDENT'S APPROVAL

The proposed work conforms to the NPS *Management Policies* and *Cultural Resource Management Guideline*, and I have reviewed and approve the recommendations, stipulations, or conditions noted in Section C of this form.

Signature of Acting Superintendent //James F. Hammett//_____

Date: 8/17/09_____

*The signed original of this document is on file at the
Environmental Planning and Compliance Office in
Yosemite National Park.*

PARK ESF ADDENDUM

Today's Date: **June 26, 2009**

PROJECT INFORMATION

Park Name: Yosemite NP

Project Number: 22760

Project Type: Facility Maintenance (FM)

Project Location:

County, State: Mariposa, California District: Parkwide,

County, State: Tuolumne, California District: Parkwide

Project Manager: Tony Brocchini

Project Title: 2008-087 Programmatic Parkwide, Routine Maintenance and Repair of Historic Buildings/Structures 2009-2013

PARK ESF ADDENDUM QUESTIONS & ANSWERS

ESF Addendum Questions	Yes	No	N/A	Data Needed to Determine/Notes
1.SPECIAL STATUS SPECIES CHECKLIST				
2. Listed or proposed threatened or endangered species (Federal or State)?		X		
3. Species of special concern (Federal or State)?		X		
4. Park rare plants or vegetation?		X		
5. Potential habitat for any special-status species listed above?		X		
6.NATIONAL HISTORIC PRESERVATION ACT CHECKLIST				
7. Entail ground disturbance?	X			Some projects will involve ground disturbance; this is covered under the Park Specific Programmatic Agreement.
8. Are any archeological or ethnographic sites located within the area of potential effect?	X			Parkwide.
9. Entail alteration of a historic structure or cultural landscape?		X		
10. Has a National Register form been completed?	X			
11. Are there any structures on the park's List of Classified Structures in the area of potential effect?	X			Parkwide.
12.WILD AND SCENIC RIVERS ACT CHECKLIST				
13. Fall within a wild and scenic river corridor?	X			Merced and Tuolumne River.
14. Fall within the bed and banks AND will affect the free-flow of the river?		X		

15. Have the possibility of affecting water quality of the area?		X		
16. Remain consistent with its river segment classification?			X	
17. Protect and enhance river ORVs?			X	
18. Fall within the River Protection Overlay?		X		
19. If Yes, remain consistent with conditions of the River Protection Overlay?			X	
20. Remain consistent with the areas Management Zoning?			X	
21. Fall on a tributary of a Wild and Scenic River?	X			Parkwide.
22. Will the project encroach or intrude upon the Wild and Scenic River corridor?		X		
23. Will the project unreasonably diminish scenic, recreational, or fish and wildlife values?		X		
100. WILDERNESS ACT CHECKLIST				
101. Within designated Wilderness?		X		
102. Within a Potential Wilderness Addition?		X		

Topic	Mitigation Measures	Timeframe
General Resource Management	Establishment of off-site staging areas on non-hardened surfaces requires consultation with the division liaison and appropriate subject-matter experts in the Resources Management and Science Division (RMS.)	Prior to and concurrent with project activities
Natural Resources	To avoid the spread of non-native, invasive plant and animal species, all fill, mulch, reseeded, and sod material brought into the park must be free of non-native, invasive plants and animals, and noxious weeds. All staff working on site shall be informed of, and follow best management practices for preventing the introduction and spread of non-native, invasive species as described in Division 1 Specifications, Section 1335 and the <i>Invasive Plant Management Plan</i> for Yosemite National Park.	Prior to project activities
	B&G will consult with the park Wildlife Management Branch Chief in RMS when maintenance activities could occur in an area that may affect sensitive wildlife or when potential to disrupt wildlife exists. For example, attics and old or uninhabited houses and garages may be bird nesting or bat habitat.	Prior to project activities
	If tree limbs, boles, or roots will be affected, the park forester will be consulted prior to work.	Prior to project activities
Cultural Resources	Maintenance activities on all historic buildings and structures require annual review and approval by the Historic Preservation Exhibits Specialist, History, Architecture and Landscapes Branch (HAL) staff, and Archeology Branch staff. Work will be described in the annual workplan and reviews will occur as part of the annual workplan review. Review will ensure that all repairs are made in kind using proper materials and methods, and will protect and preserve the historic character of the buildings. All work will require before and after photo-documentation.	Prior to project activities
	All routine maintenance and facilities work will be done in accordance with recommendations from <i>A Sense of Place: Design Guidelines for Yosemite Valley and Yosemite National Park</i> (document forthcoming).	Concurrent with project activities
	Repairs, replacement, and upgrading of facilities to meet code will only occur when: materials are replaced in kind, non-original fixtures are replaced, or repairs maintain the historical character of the period of significance, and upgrades do not damage historic materials. All work complies with the Secretary of the Interior's Standards for the Treatment of Historic Properties.	Concurrent with project activities
	Although not expected, should previously unknown American Indian burial sites be discovered during routine building maintenance, provisions outlined in the Native	Concurrent with project activities

Topic	Mitigation Measures	Timeframe
	American Graves Protection and Repatriation Act and its implementing regulations will be followed. The park Archeology and Anthropology Branch Chief and the park Native American Liaison will be contacted as soon as possible.	
	In the unlikely event that previously unknown cultural resources are encountered during routine building maintenance, B&G staff will temporarily suspend work in the immediate area and contact the park Archeology and Anthropology Branch chief to evaluate the materials and determine appropriate action.	Concurrent with project activities
	Underground Service Alert (USA Dig) will be contacted a minimum of 48 hours prior to any planned digging to locate utilities. At this time, RMS will be automatically notified to identify the potential to affect archeological sites and to develop appropriate treatment measures, if necessary (including in previously disturbed areas).	Prior to project activities
