Memorandum

To: Jim Vandenberg, Project Manager, Yosemite National Park

From: Acting Superintendent, Yosemite National Park

Subject: NEPA and NHPA Clearance: 2009-083 Yosemite Lodge Replace 4100 Building Roofs (27098)

The Management Team has reviewed the proposed project/action and completed its environmental assessment documentation, and we have determined that there:

- Will not be any effect on threatened, endangered, or rare species and/or their critical habitat.
- Will not be any effect on historical, cultural, or archeological resources.
- Will not be serious or long-term undesirable environmental or visual effects.

The subject proposed project therefore, is now cleared for all NEPA and NHPA compliance requirements as presented above. Project plans and specifications are approved and construction and/or project implementation can commence.

For the proposed project actions to be within compliance requirements during construction and/or project implementation, the following mitigations must be adhered to:

- Ensure that all equipment and materials brought into the park are free of non-native, invasive plants and animals, and noxious weeds. All staff working on site shall be informed of and follow best management practices for preventing the introduction and spread of non-native, invasive species as described in Division 1 Specifications, Section 1335.

Project: 2009-083 Yosemite Lodge Replace 4100 Building Roofs

PEPC ID: 27098

Project Description: The purpose of this project is to replace roofing on the following Yosemite Lodge 4100 Buildings: Aspen, Dogwood, and Tamarack. The roofing material on these three buildings has deteriorated, and there is possible wood-rot and termite damage. Initial inspection indicates ineffective roof drainage. Subject to review by the Park Historical Architect, the new roofing material will closely match the color, texture and seamless appearance, of the existing built-up roofing.

Scope of Work: The general scope of construction is to replace the existing rock roof coverings with Bituthene-type roof material. The project will include architectural and engineering evaluation of the roof system resulting in configuration and construction for each building and recommendations for roof material. A termite inspection will determine the extent of damage; the damage will be mitigated as necessary.

The following work would be performed on each unit:

- Remove all existing roofing materials to sheeting.
- Repair and/or replace wood skip sheeting and wood components as needed.
- Install foam insulation and plywood on roof for energy efficiency.
- Replace all vent pipe flashings.
- Retain all wall step flashings if usable; if they are too deteriorated, they will be replaced in kind as needed.
- Install Bituthene-type roofing materials on all slopes less than 4/12.
- Install tie off D-strap loops at ridge for fall protection.
- All sheet metal will be factory painted.
- Paint all metals and replaced wood components to match existing materials.

Project Goals:

- Install an appropriate waterproof roof system with a 25-year life expectancy.
- Energy efficiency will be considered that will primarily include new insulation in the attic spaces, as necessary.

Project Location:

Mariposa County, CA

Mitigations:

- Ensure that all equipment and materials brought into the park are free of non-native, invasive plants and animals, and noxious weeds. All staff working on site shall be informed of and follow best management practices for preventing the introduction and spread of non-native, invasive species as described in Division 1 Specifications, Section 1335.

Describe the category used to exclude action from further NEPA analysis and indicate the number of the category (see Section 3-4 of DO-12):

C.3 Routine maintenance and repairs to non-historic structures, facilities, utilities, grounds and trails. On the basis of the environmental impact information in the statutory compliance file, with which I am familiar, I am categorically excluding the described project from further NEPA analysis. No exceptional circumstances (e.g. all boxes in the ESF are marked "no") or conditions in Section 3-6 apply, and the action is fully described in Section 3-4 of DO-12.
