From: Superintendent, Yosemite National Park

Subject: NEPA and NHPA Clearance: 2010-003 Wawona Thomas Hill Studio Fountain Rehabilitation (28528)

The Leadership Team has reviewed the proposed project actions and completed its environmental assessment documentation, and we have determined that there:

- Will not be any effect on threatened, endangered, or rare species or their critical habitat.
- Will not be any effect on historical, cultural, or archeological resources.
- Will not be serious or long-term undesirable environmental or visual effects.

The proposed project, therefore, is now cleared for all NEPA and NHPA compliance requirements as presented above. Project plans and specifications are approved, and construction or project implementation can commence.

For the proposed project actions to be within compliance requirements during construction or project implementation, the following mitigations must be adhered to:

## Categorical Exclusion Form

**Project:** 2010-003 Wawona Thomas Hill Studio Fountain Rehabilitation

**PEPC Project Number:** 28528

**Project Description:** This project would rehabilitate the non-functioning and decorative fountain in front of the Thomas Hill Studio. Research by the Yosemite National Park Historical, Architecture and Landscape Branch found that the fountain was a reflecting pool (standing water with no fountain), so it would be rehabilitated to its historical appearance and function.

The skills of park staff would be used in the design/build approach to the project. Engineering for a sustainable approach to water conservation has been completed. Plans include the integration of water conservation features such as recycling and filtering to reduce water consumption.

### Scope of Work

- Repair, replace or upgrade the existing waterworks components (including subsurface plumbing, backflow prevention, the pump, the pressure pipe, and the fountain nozzle).
- Rehabilitate the concrete fountain basin.
- Dig a 20-foot-long by 12-inch-wide by 24-inch-deep trench from Hill's Studio to the fountain to replace the water line that supplies water to the fountain.
- Provide archeological monitoring during excavation.
- Repair concrete masonry following appropriate historic preservation techniques per Secretary of the Interior's *Standards for the Treatment of Historic Properties*.

### Project Location:

Mariposa, CA

### Mitigation(s):

- No mitigations identified

**Describe the category used to exclude action from further NEPA analysis and indicate the number of the category (see Section 3-4 of DO-12):**

C.4 Routine maintenance and repairs to cultural resource sites, structures, utilities and grounds under an approved Historic Structures Preservation Guide or Cyclic Maintenance Guide; or if the action would not adversely affect the cultural resource.

On the basis of the environmental impact information in the statutory compliance file, with which I am familiar, I am categorically excluding the described project from further NEPA analysis. No exceptional circumstances or conditions in Section 3-6 apply, and the action is fully described in Section 3-4 of DO-12.
